SUMMARY

Data Engineer with 4+ years of experience building distributed ETL systems and large-scale data platforms. Experienced with Spark, Airflow, Kafka, and cloud infrastructure across AWS and GCP. Recently built end-to-end AI applications, combining production data engineering with practical LLM integrations.

Technical skills

Python • SQL • Scala • Java • C++ | Spark • Airflow • Kafka | Docker • Kubernetes • Terraform | AWS • GCP | Vertica • MongoDB • BigQuery • HDFS

EXPERIENCE

NEXXEN
Big Data Engineer | Mar 2022 – Sep 2025

- Built Spark and Kafka based components for a next-generation bidstream platform processing billions of advertising requests per day, improving cost efficiency, storage utilization, and data quality.
- Built ETL pipelines orchestrated by Airflow to process bidstream data from HDFS into Vertica and export processed datasets from Vertica to Amazon S3.
- Consolidated six Kafka topics into a unified ingestion pipeline and implemented configurable deduplication to improve data quality.
- Optimized Vertica loading and large-scale joins, collaborating closely with DBAs to improve ingestion performance and storage efficiency.
- Designed and built a customer-facing ETL pipeline enriching client IP datasets by joining customer data from Amazon S3 with graph data stored in HDFS.

Selected Engineering Projects

Stock Intelligence Platform

- Built a production stock intelligence platform that automatically ingests, enriches, validates, and analyzes financial market data using Airflow, MongoDB, Docker, and GCP.
- Developed a natural-language AI agent enabling conversational querying of financial market data using LLMs.
- Implemented Terraform, CI/CD, monitoring, and automated validation, maintaining costs below **$20/month**.

AI Mood Debugger

- Built a production AI application combining deterministic reasoning with LLM-generated guidance to help users understand the factors contributing to low mood.
- Implemented structured questionnaires, diagnostic pipelines, deterministic fallbacks, and AI-generated summaries to improve reliability and user experience.

Earlier Experience

SEO Manager - Led enterprise SEO initiatives using analytics and technical optimization.

EDUCATION

Ben-Gurion University - B.Sc. (Honors Program) in Computer Science, Neuroscience and Psychology | 2015-2019 | GPA: 83

SERVICE & VOLUNTEERING

IDF (Armored Corps & Experimental Unit) - Soldier and Commander | 2010-2013

- SPCA Tel Aviv - volunteering with anxious dogs and website/digital support | 2024-Present
- Year of Service (Shnat Sherut) - community volunteering and youth mentoring | 2009-2010
